Summary

B.Tech Computer Science Engineering (AI) student at VIT Pune focused on machine learning, generative AI, and applied data science. Built real-time ML systems, autonomous AI agents, and privacy-focused AI applications, with hands-on experience in predictive modeling, model optimization, and deploying AI solutions for practical business use cases.

Technical Skills

Languages	Python, C++, JavaScript, TypeScript, SQL, Bash/Shell
ML / AI	Neural Networks, Deep learning, Generative AI, NLP, LLMs, Federated Learning, Model Optimization, Data Analysis, Predictive Modeling NumPy, Pandas, PyTorch, TensorFlow, Scikit-learn, OpenCV, torchaudio, librosa, Hugging Face, LangChain, Jupyter
Web Development	React, Next.js, Node.js, Express.js, FastAPI, Streamlit, REST APIs, WebSockets
DB/ Cloud/Tools	MongoDB, MySQL, PostgreSQL, Docker, Google Cloud, Git, Selenium, n8n

Projects

Neuro-Sound AI – Personalized Music Generation using Deep Learning [Try Here](#) / Feb-March 2025

PyTorch, torchaudio, librosa, Streamlit *Research Paper Accepted (IEEE Conference)*

- Built an EEG-inspired deep learning model to generate personalised therapeutic audio for focus and sleep.
- Deployed a Streamlit interface for real-time audio synthesis at 22 kHz with end-to-end latency under 500 ms.
- Reduced model memory footprint to 1.2 GB through pruning and quantisation for CPU-friendly deployment.

Autonomous AI Browsing Agent for E-commerce [Github](#) / Sept-Dec 2025

Python, Selenium, Google Generative AI, ASR, NLU

- Automated multi-step web research and purchase workflows combining ASR, NLU, scraping and LLM reasoning.
- Integrated LLM-based reasoning with web scraping and APIs for robust multi-step automation.

ZRewards – Cross-Chain Rewards Platform (Hackathon Winner) [Link](#) / Dec 2025

Zetachain, Solidity, React, Node.js, Web3.js

- Built a cross-chain rewards DApp on Zetachain for issuing and redeeming loyalty points across blockchain networks.
- Implemented Solidity smart contracts for issuance, bridging, and redemption, with wallet connectivity.

AarogyaAI – Privacy-First Medical AI with LLM Council & Federated Learning [GitHub](#) / Feb-March 2026

Next.js, FastAPI, Uvicorn, scikit-learn, FAISS, SQLite, LLM APIs

- A multi-model LLM Council to provide clinical reasoning about symptoms, preserved data privacy through local inference
- Improves over time through Federated Learning without sharing raw user data

Experience

Industry Offered Project – Accelera [GitHub](#) / Jan-March 2026

- Designed AI-driven automation solutions for pharmacy supply chain workflows, including an offline-first bill parsing system for Indian pharmacies.

Exam & Management Head – Office of International Relations, VIIT Pune

/ Aug 2023 – Aug 2025

- Hosted international education events, managed student exchange programs and liaised with foreign university representatives

Education

B.Tech in Computer Science and Engineering (Artificial Intelligence)

VIIT Pune / 2023 – 2027

Vishwakarma Institute of Information Technology, Pune – Affiliated to Savitribai Phule Pune University

Relevant Coursework: Data Structures & Algorithms, Design & Analysis of Algorithms, Machine Learning, Deep Learning, Generative AI, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming

Achievements

- **Winner** – Zetachain Vibe Coding Hackathon; cross-chain rewards DApp awarded USD 100 prize.
- **Runner-up** – VIIT Hackathon (Rs. 6,000 prize); **Finalist** – IIT Bombay Techfest Quantitative Challenge.
- **Smart India Hackathon (Internal Round)** – Ranked Top 17 of 300+ teams for AI-driven public-sector solution.
- **Government of India Copyright** – “Data Analytics Framework: Relative Analysis on Global Factors”.
